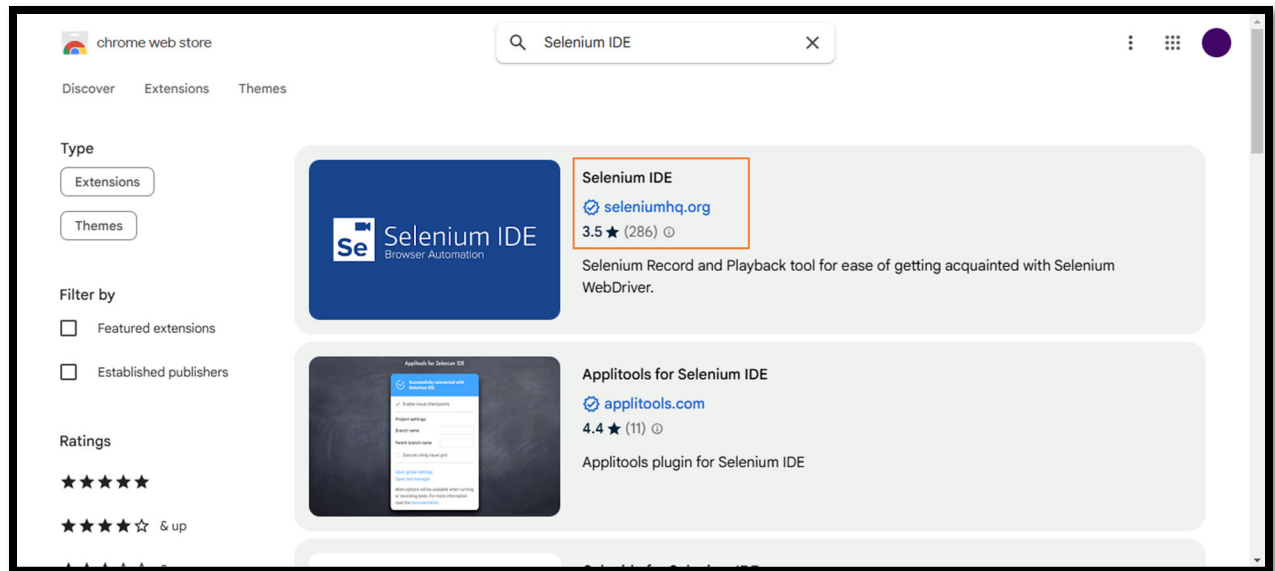

Fig3: Choose the First One

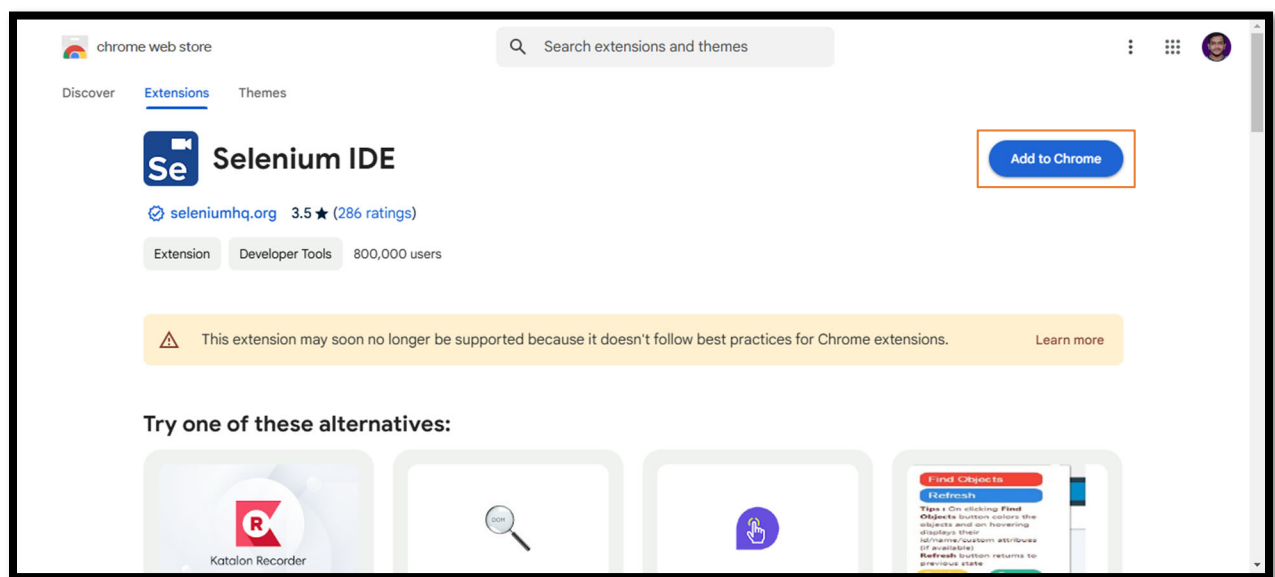

Fig4: Then 'Add to Chrome'

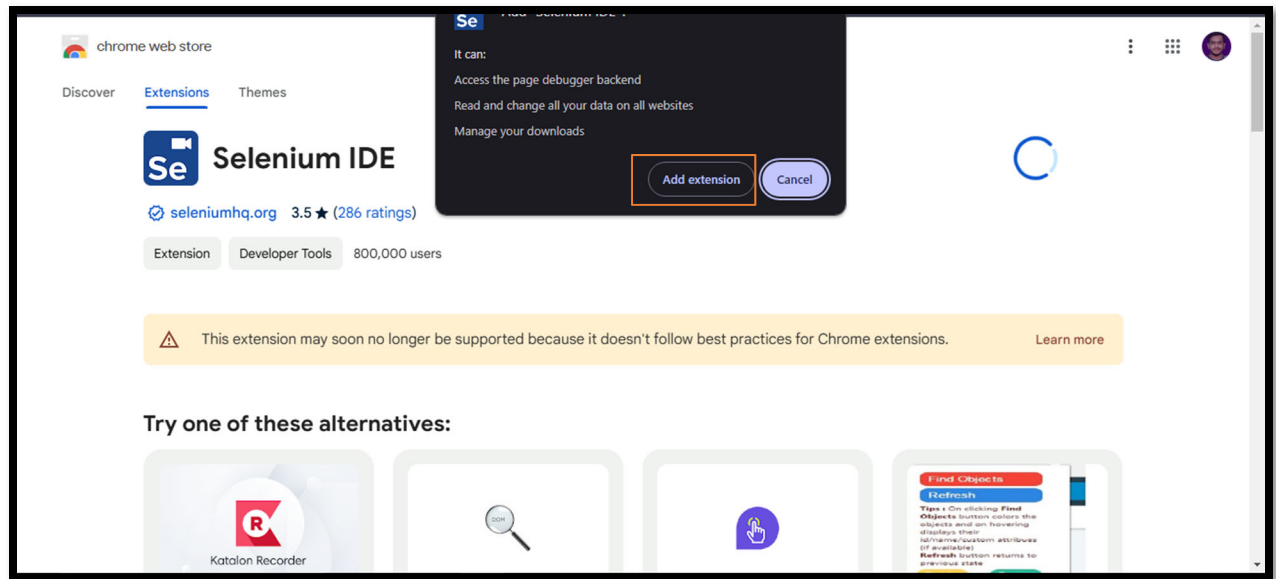

Fig5: Click ‘Add extension’ option for successfully installing the Selenium extension

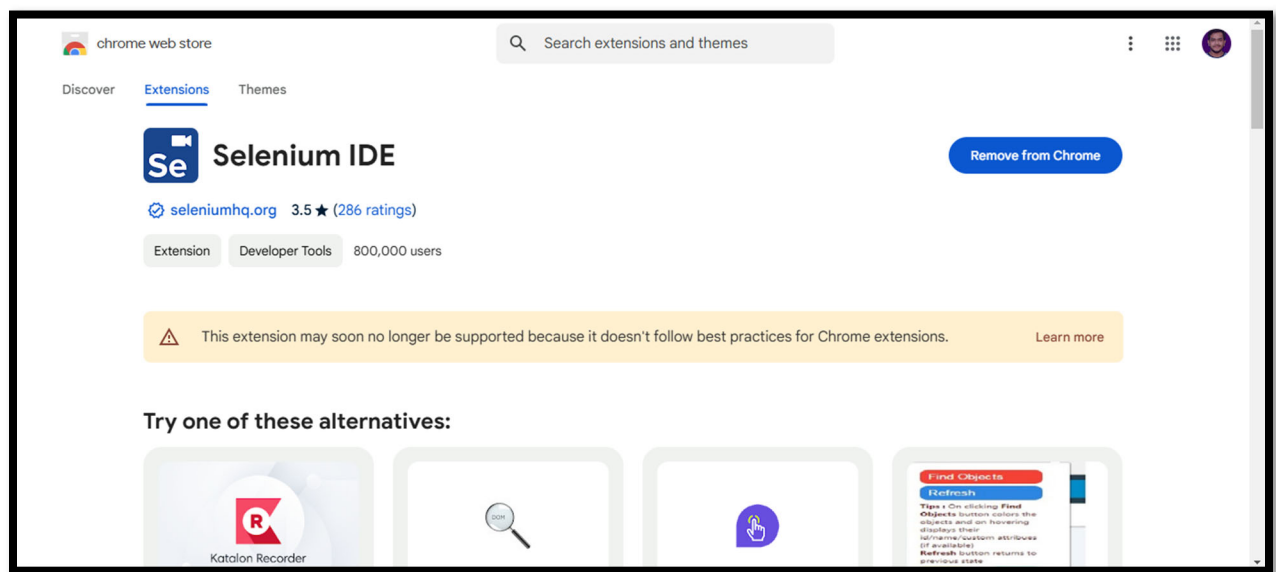

Fig6: Successfully Installed the ‘Selenium IDE’

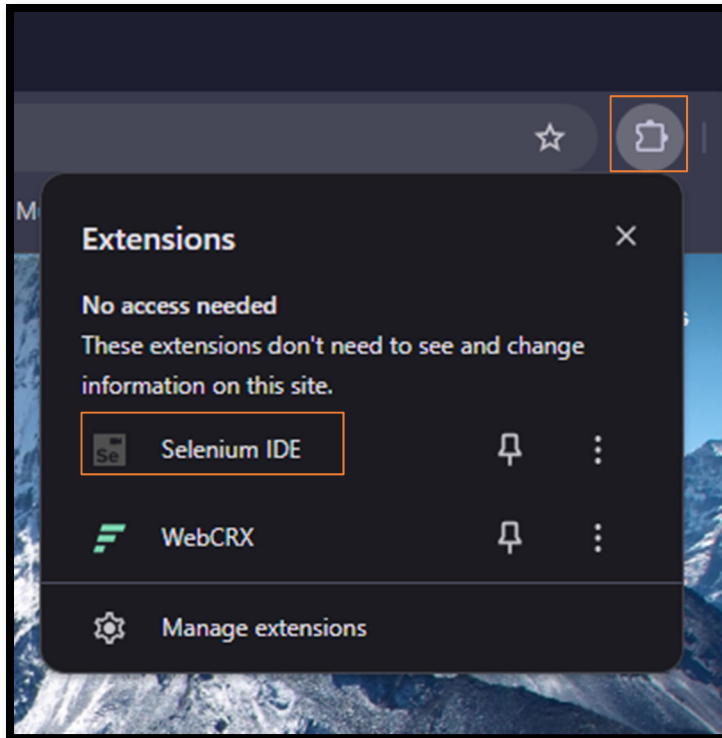

Fig7: Open the ‘Selenium IDE’ from the extension section of Chrome

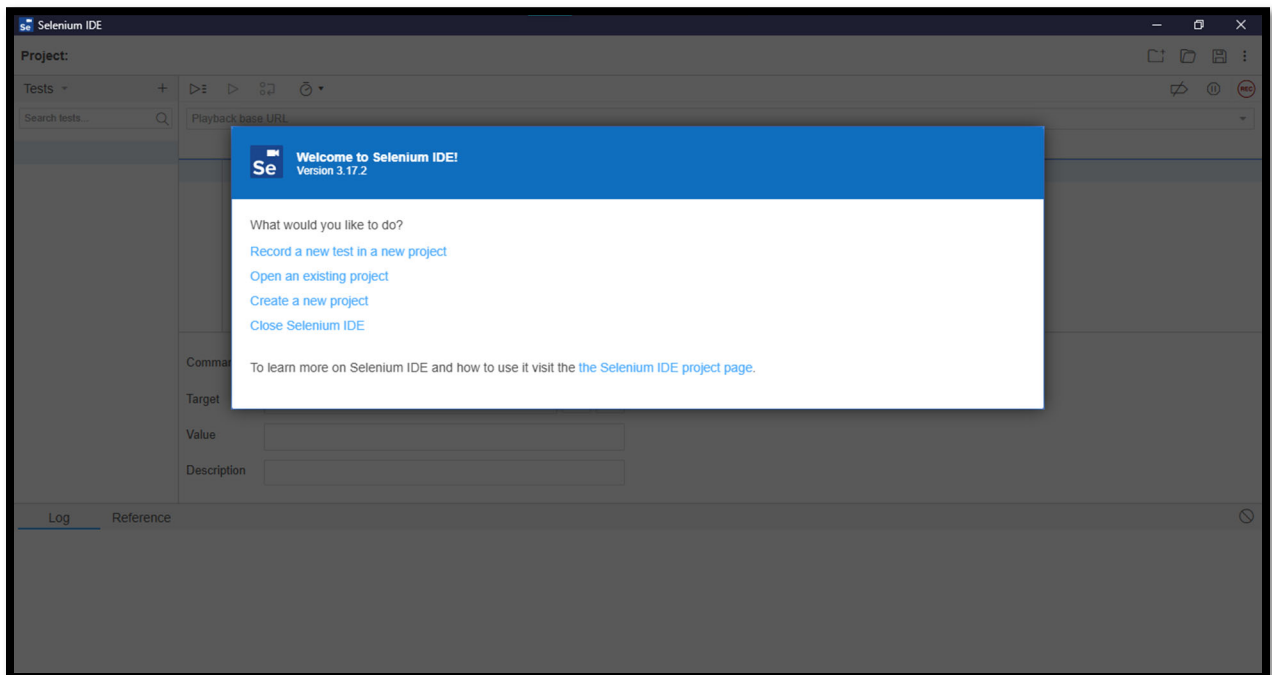

Fig8: Successfully open the interface of ‘Selenium IDE’ extension

TASK: PROJECT TESTING

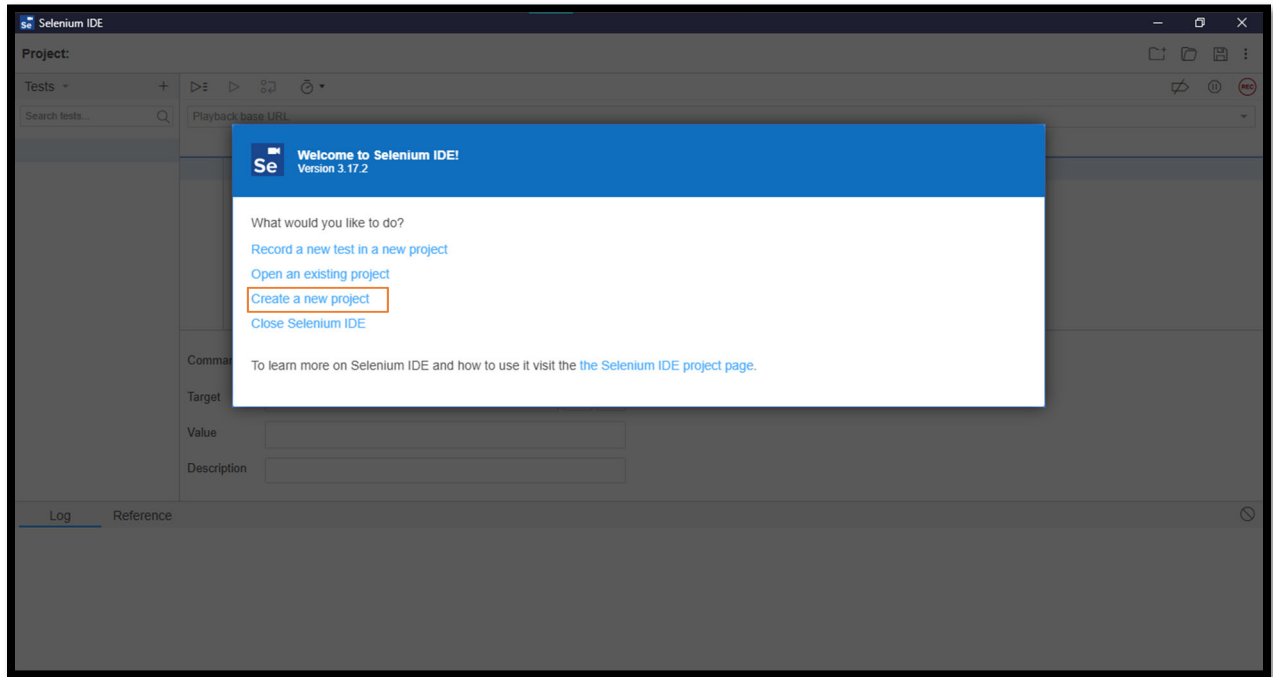

Fig1: Create a new Project

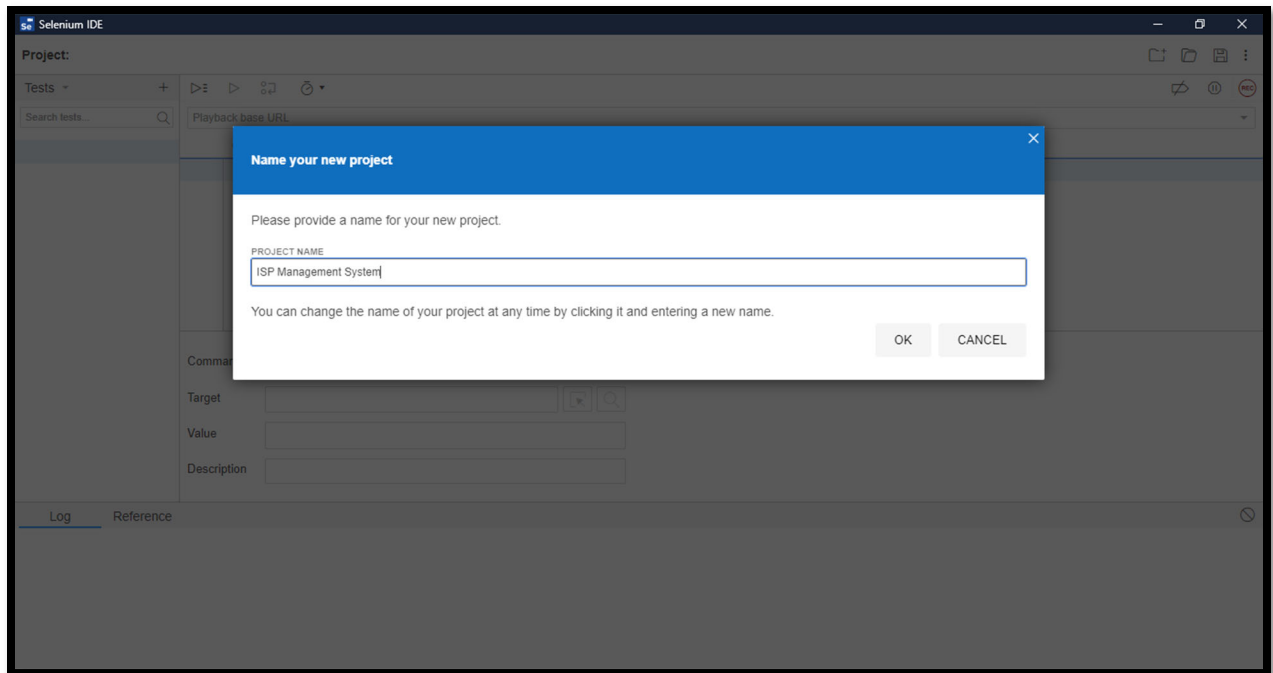

Fig2: Given my project name

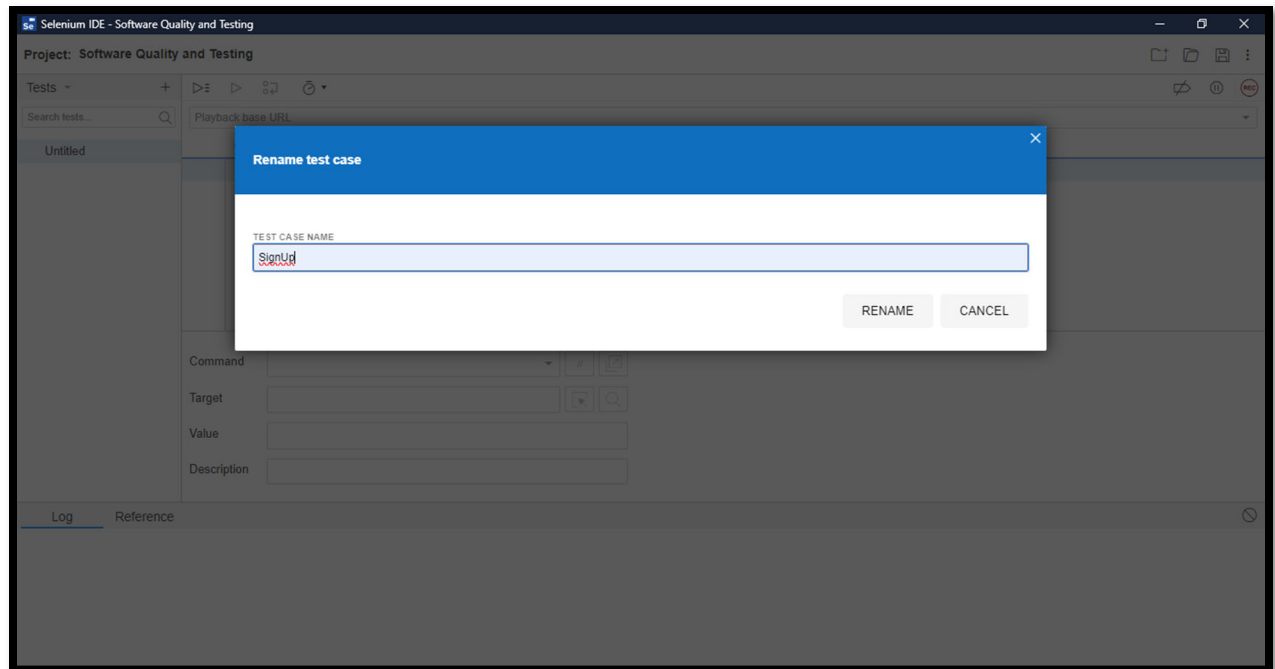

Fig3: Given the test case name for the testing module

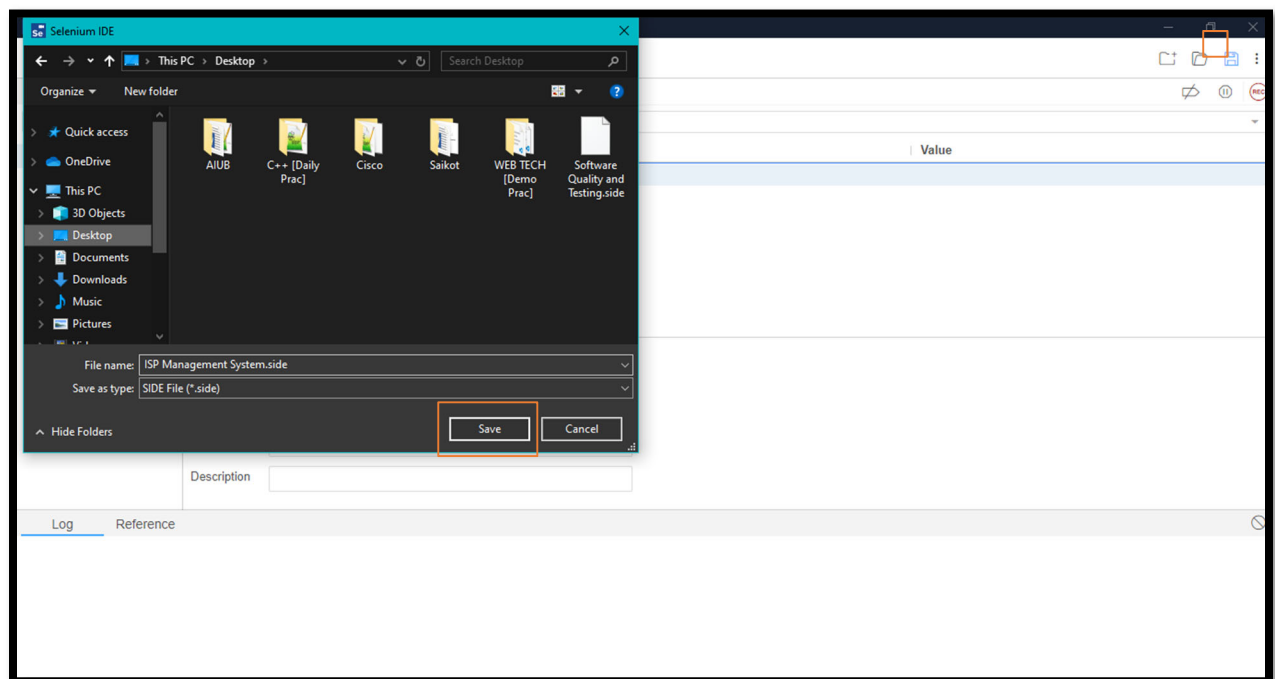

Fig4: Save the project

Testing for Register Module:

http://127.0.0.1/Tours-and-Travels-Website-main/finalproject/Final%20Project/control/register.php

Fig5: Assign URL

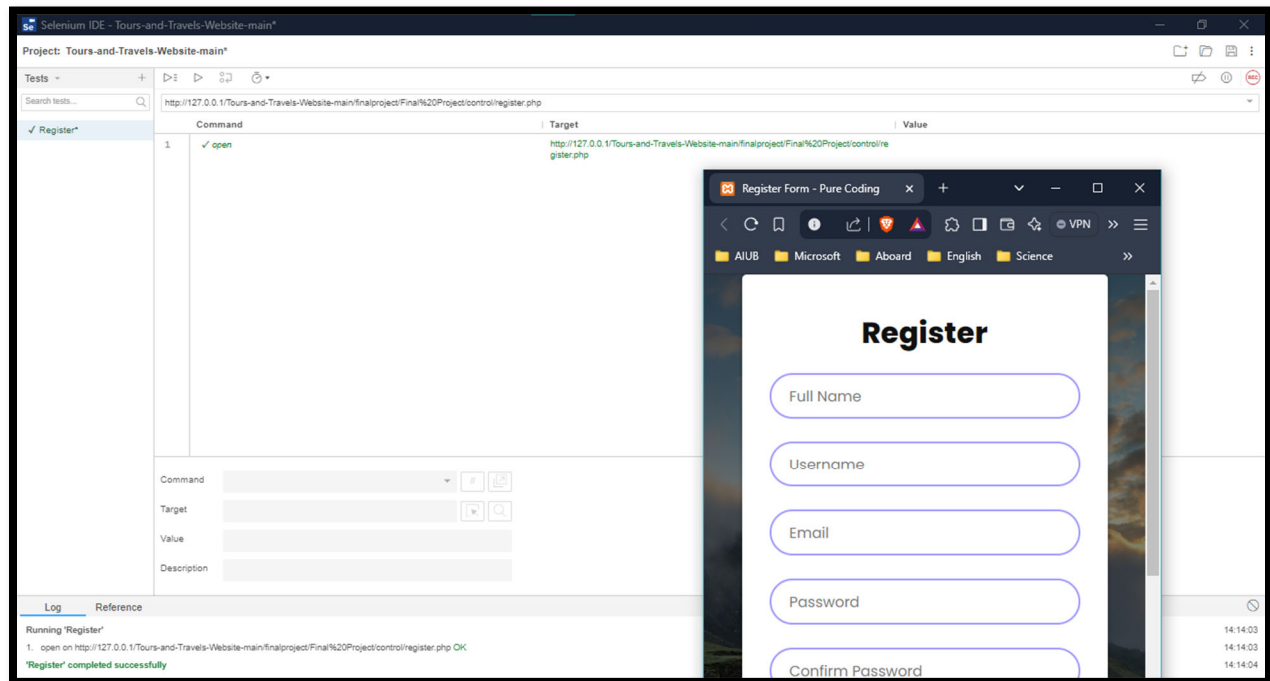

Fig6: Valid test for opening the page

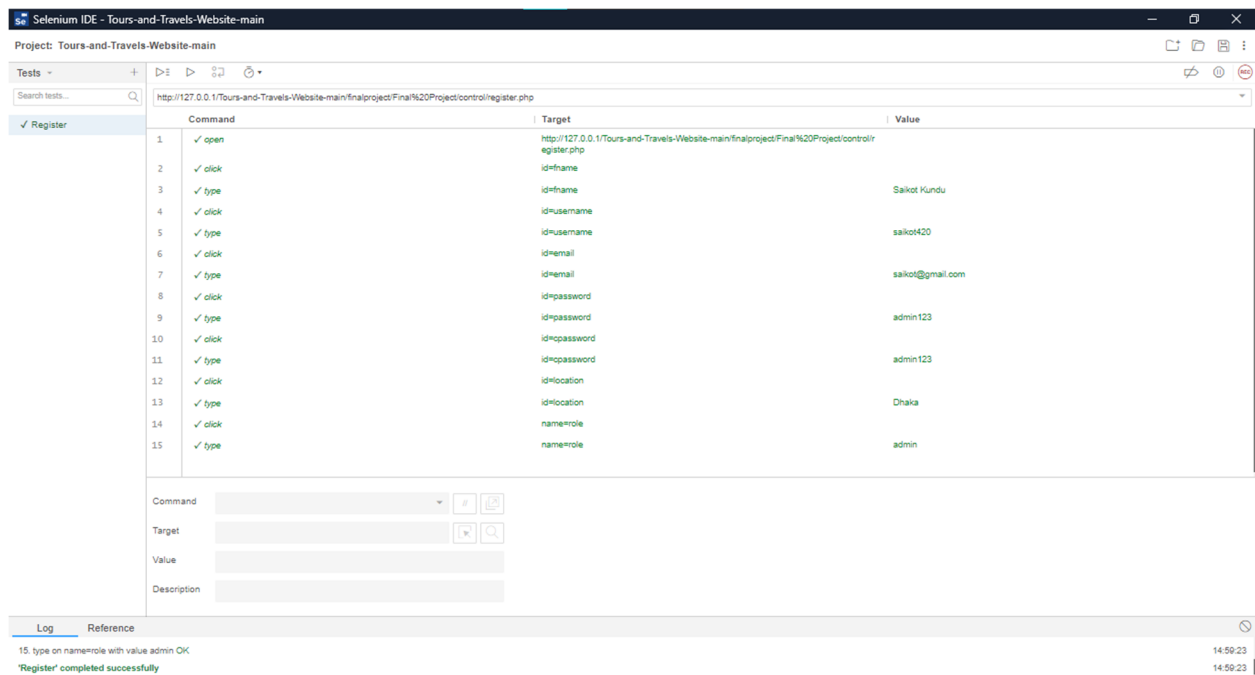

Fig7: Test with all valid credentials

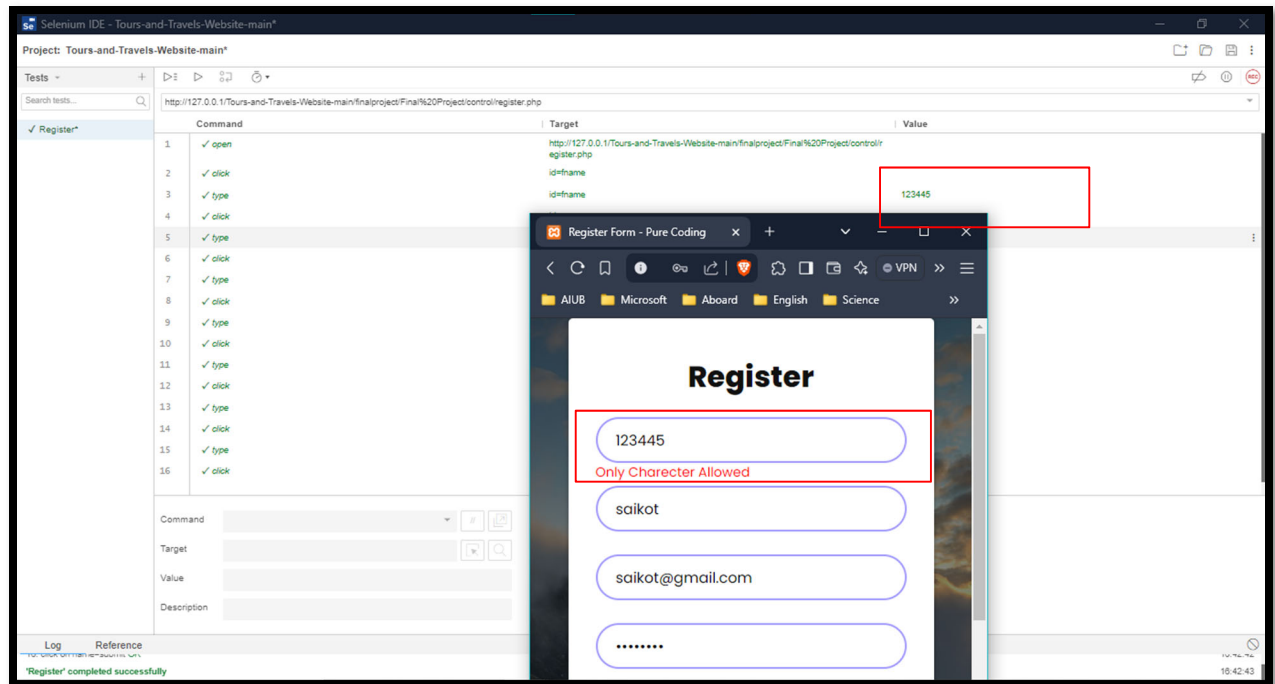

Fig8: Testing with invalid Input (Wrong name)

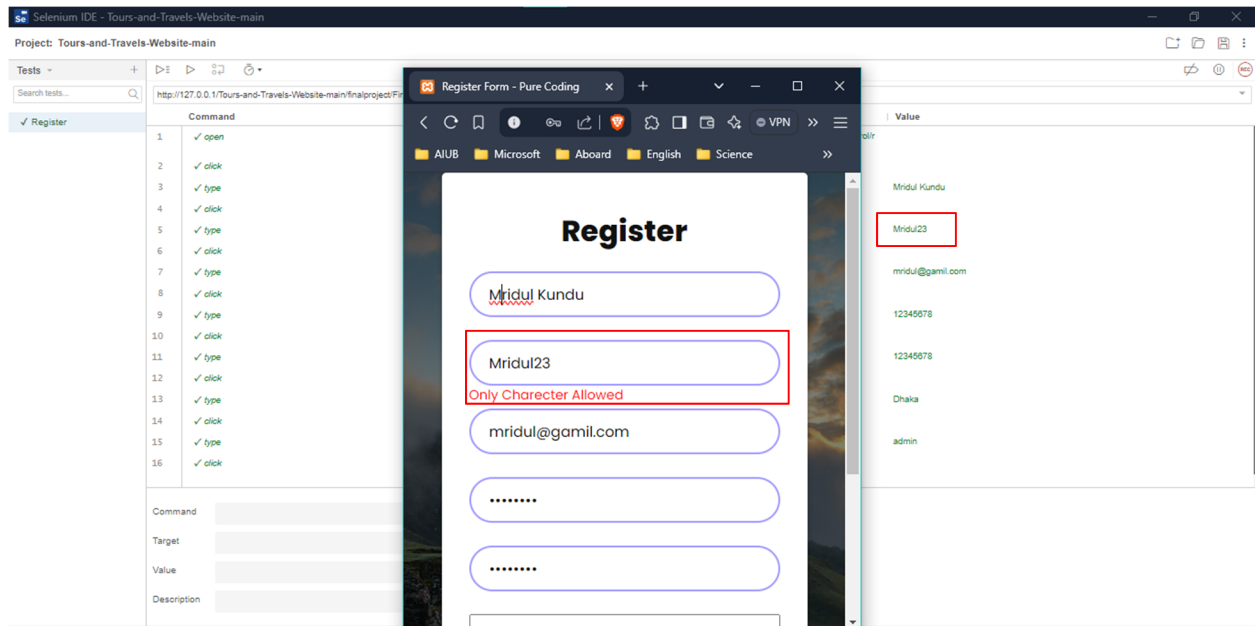

Fig9: Testing with invalid Input (Wrong Username)

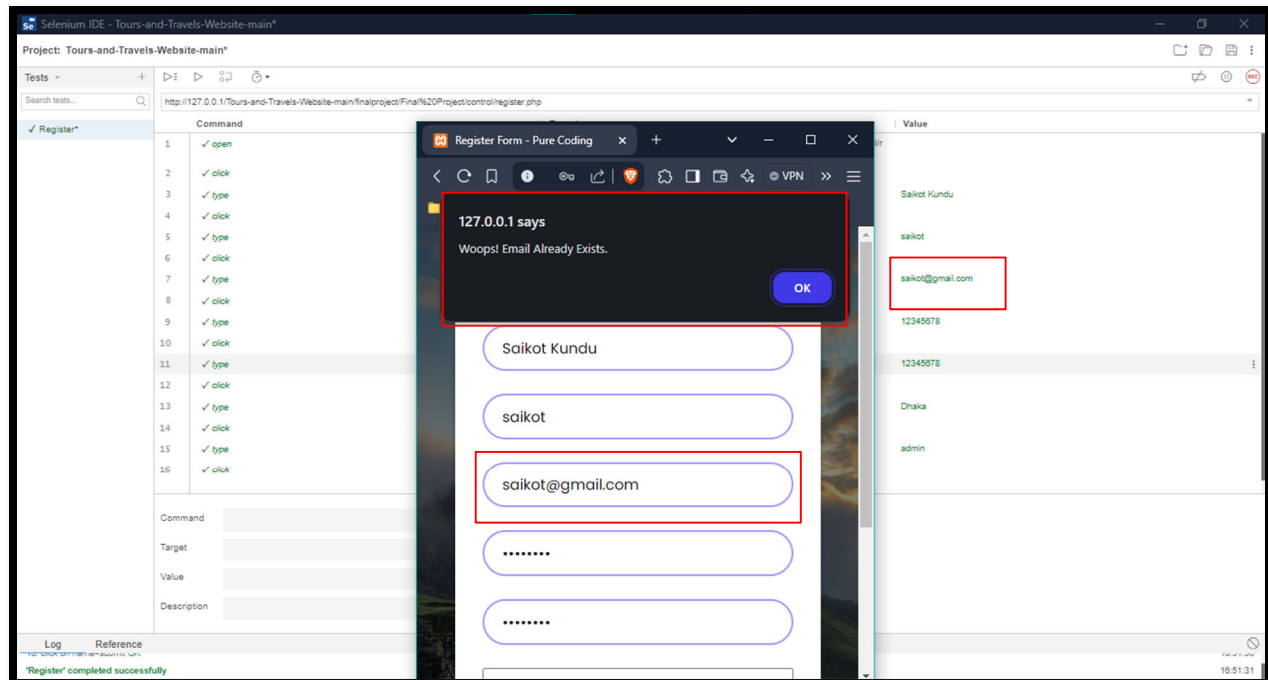

Fig10: Testing with invalid Input (Existing Email Address)

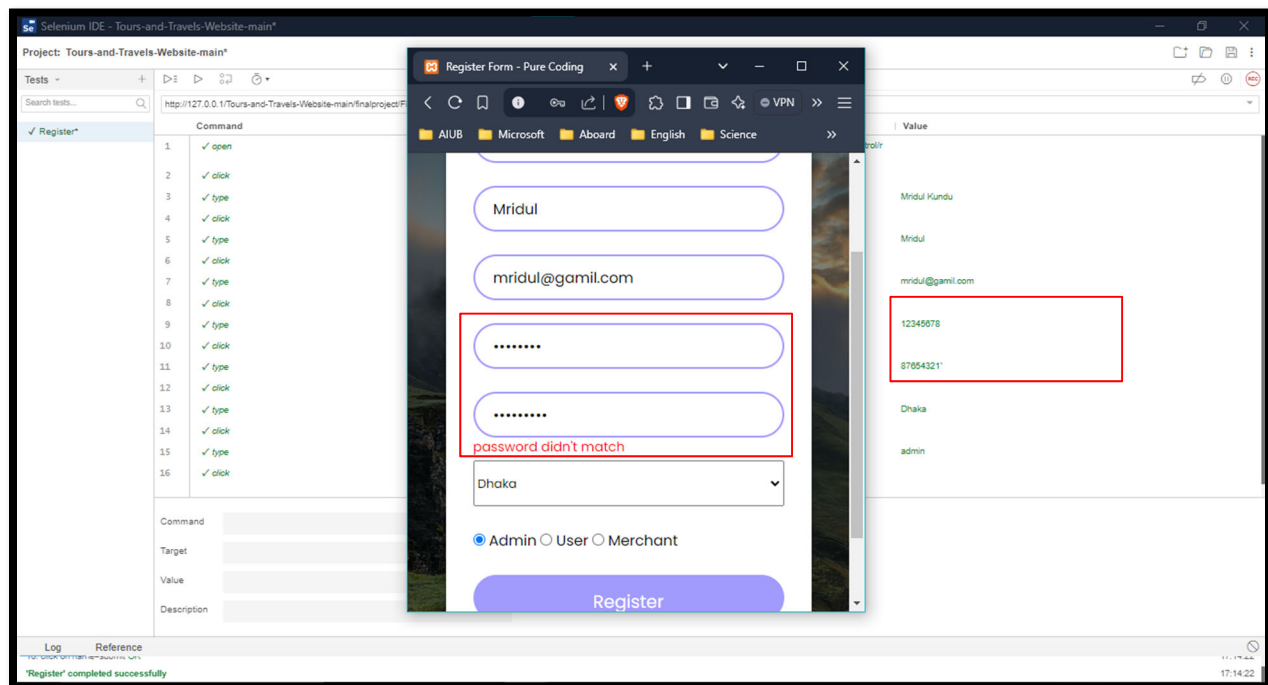

Fig11: Testing with invalid Input (Wrong confirm password)

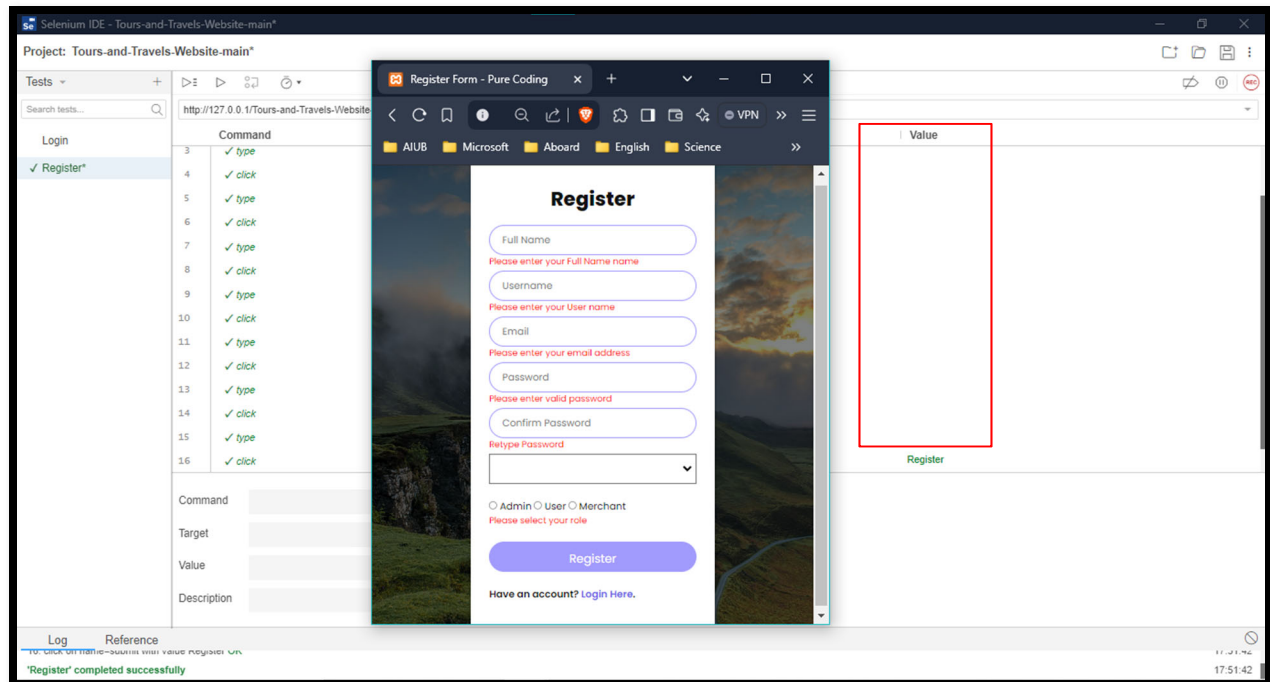

Fig12: Testing with invalid Input (Empty Field)

Testing for **LogIn** Module

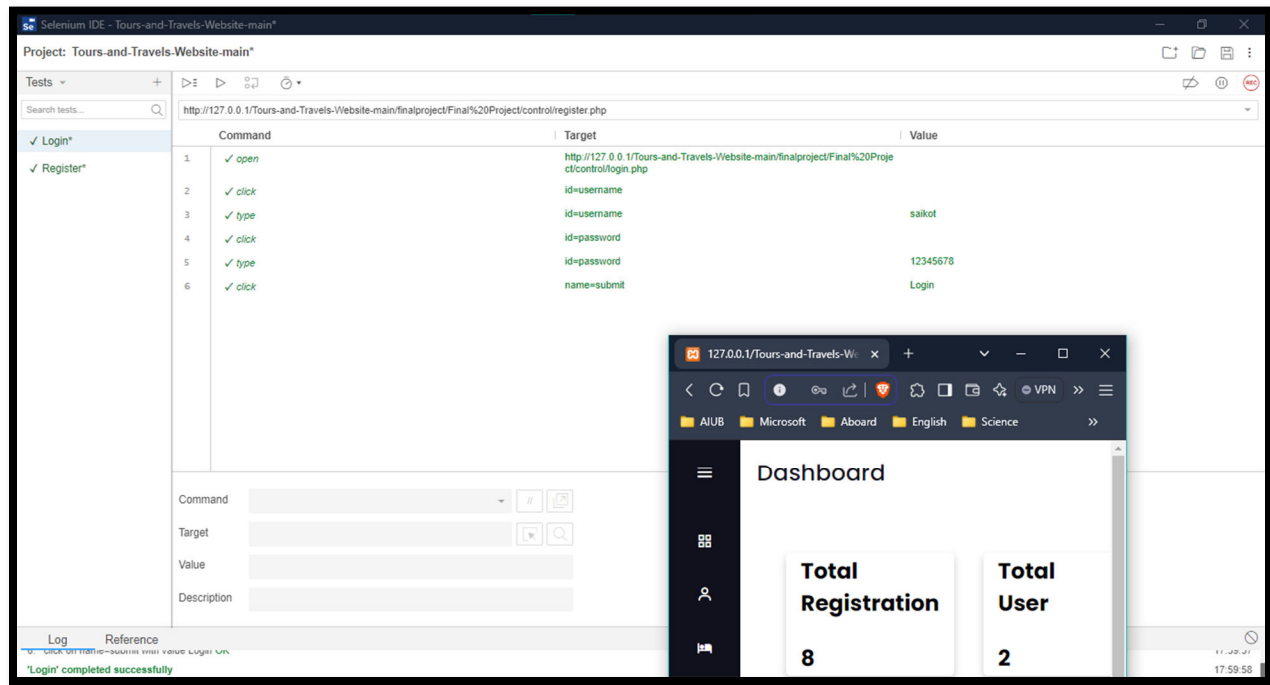

Fig13: Test with all valid credentials

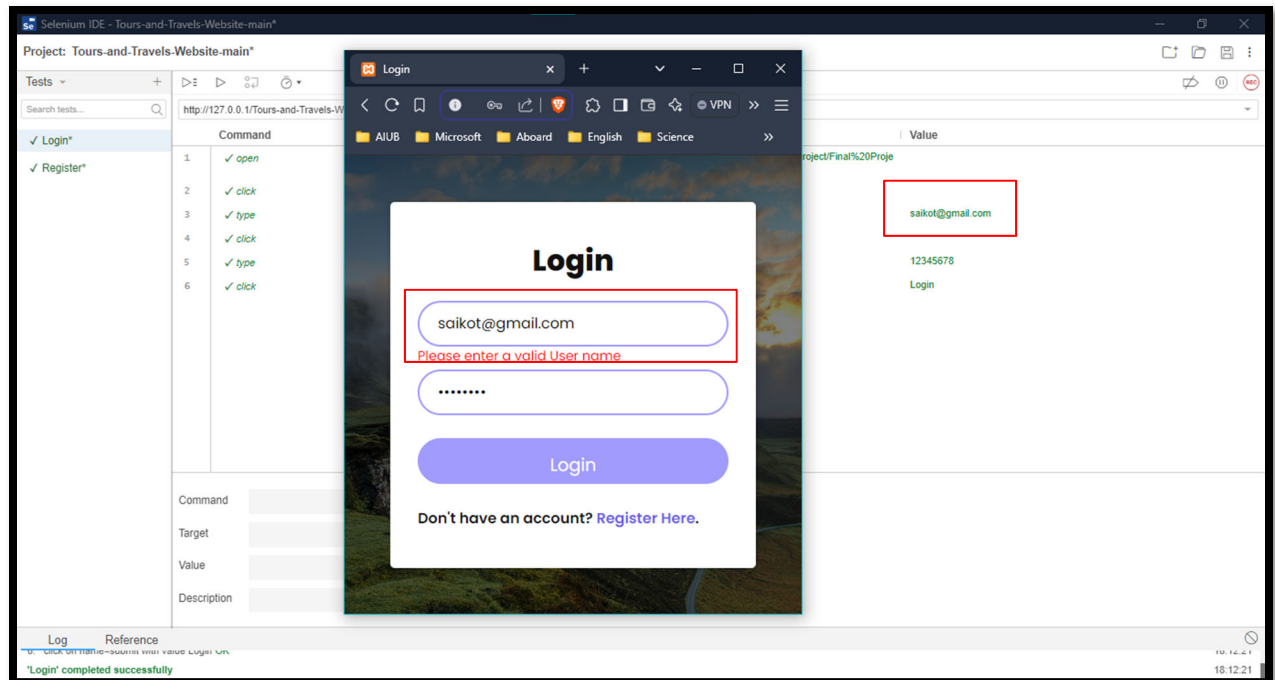

Fig14: Testing with invalid Input (Wrong Username)

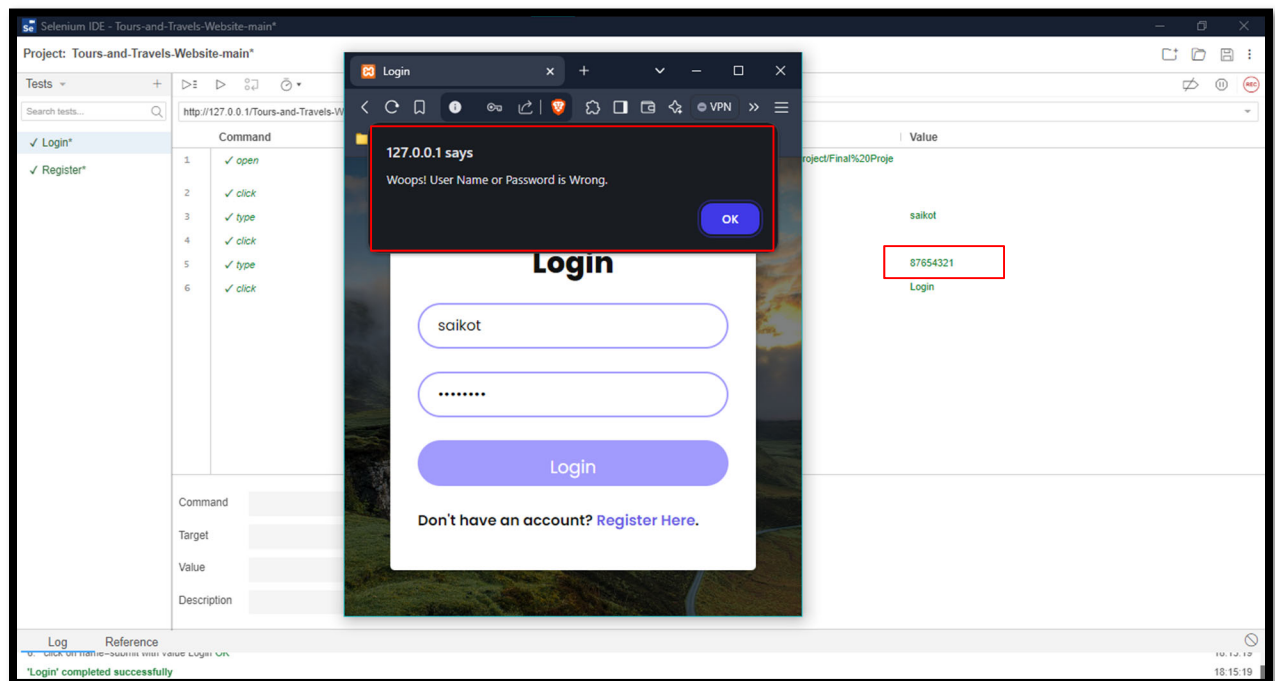

Fig15: Testing with invalid Input (Wrong Password)

Testing for User Module Admin:

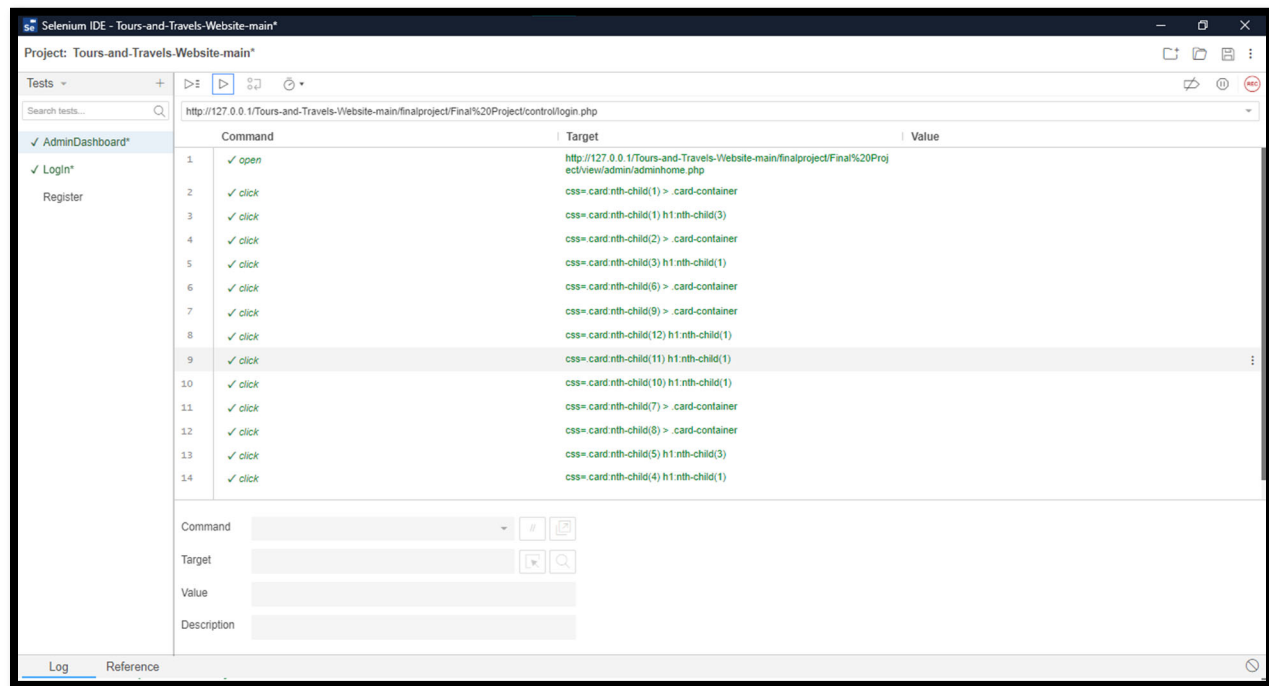

Fig16: Successful test for Admin Dashboard Feature

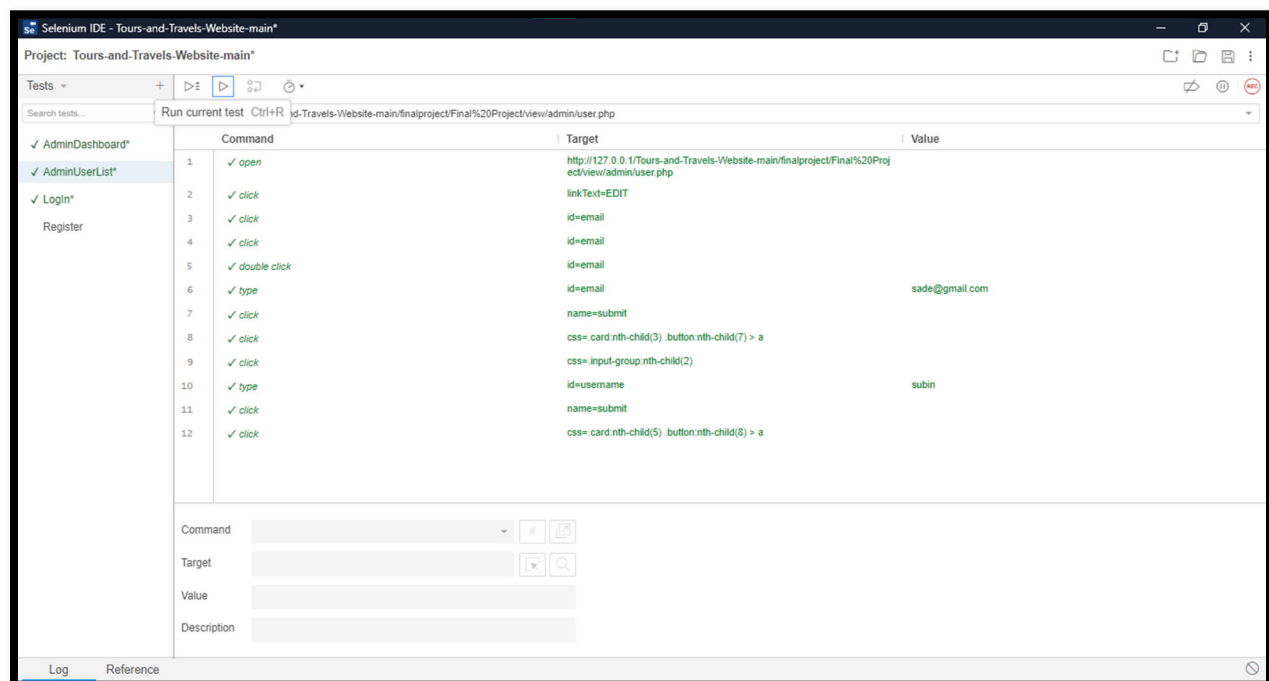

Fig17: Testing the feature "User List" for Admin Module (By Editing details & Delete User)

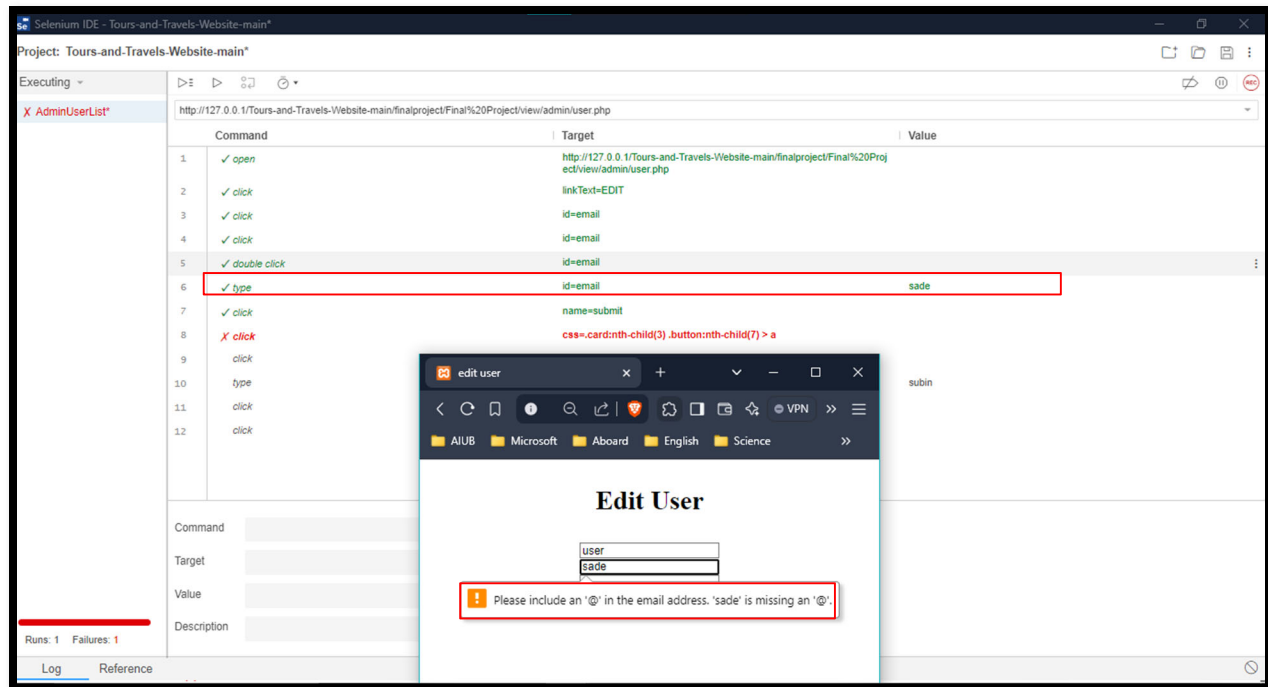

Fig18: Testing the feature “User List” for Admin Module (With Invalid Email)

USER:

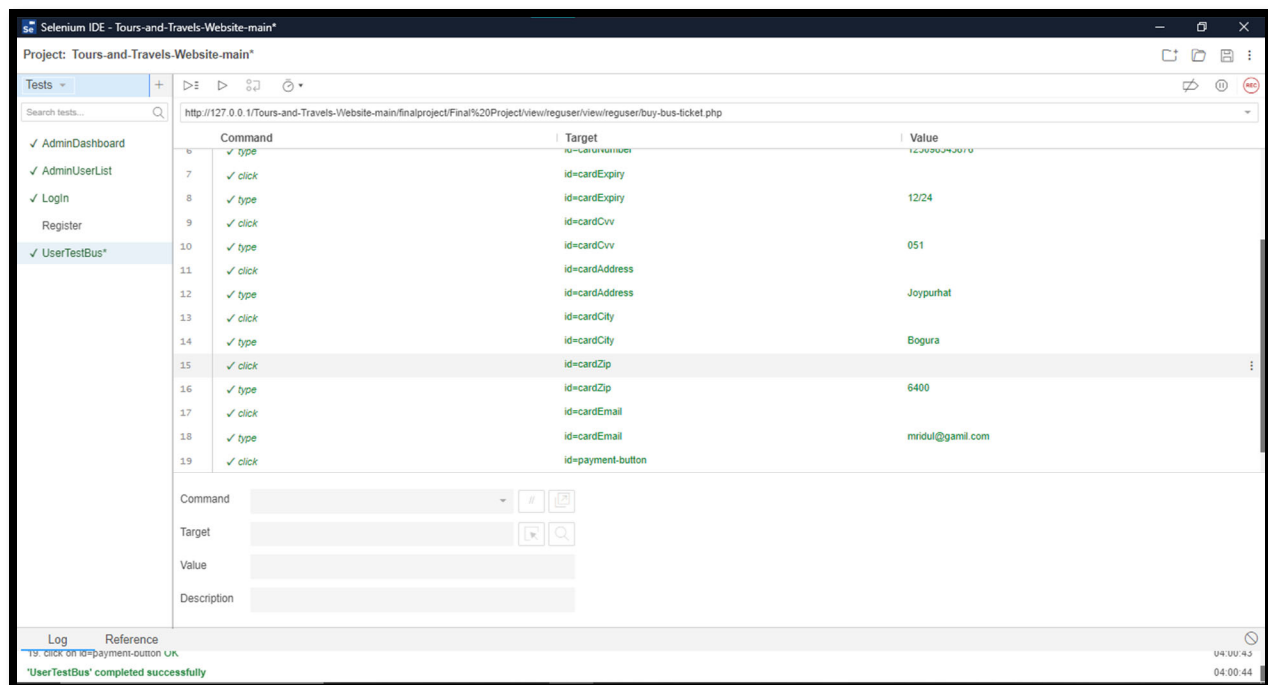

Fig19: Testing the feature for buying a ticket (with all valid field) by a user of the system

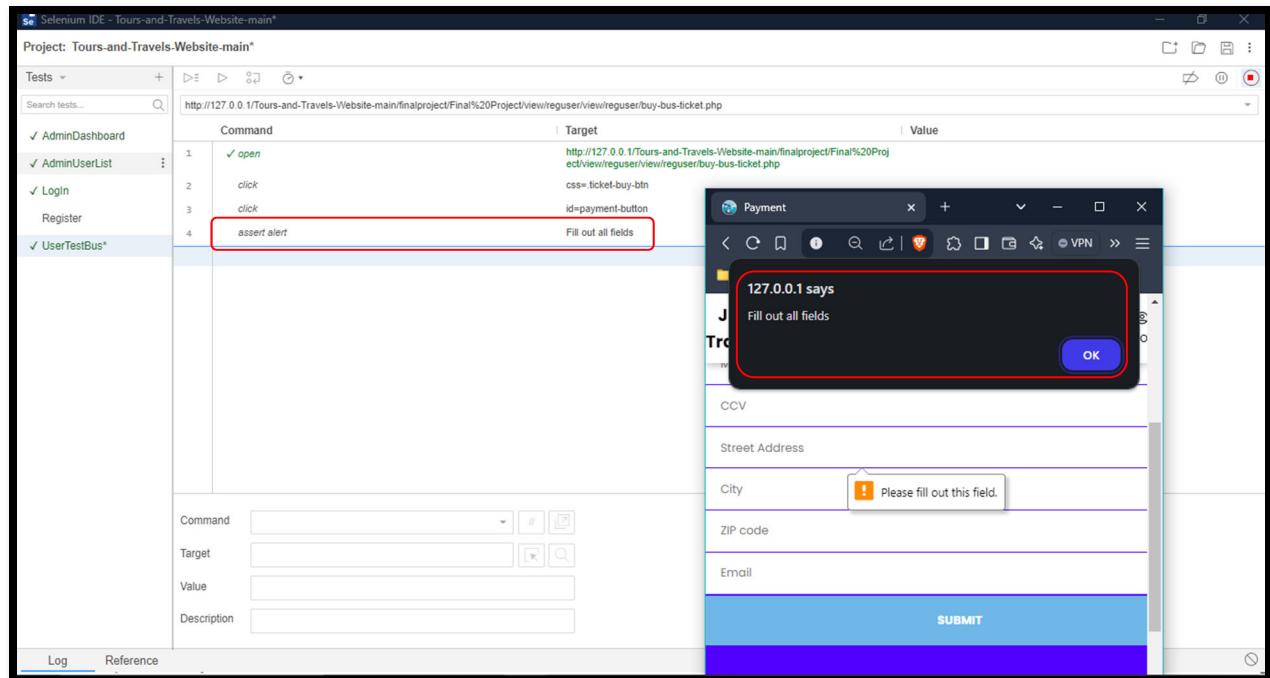

Fig20: Testing the feature for buying a ticket (with all empty fields) by a user of the system

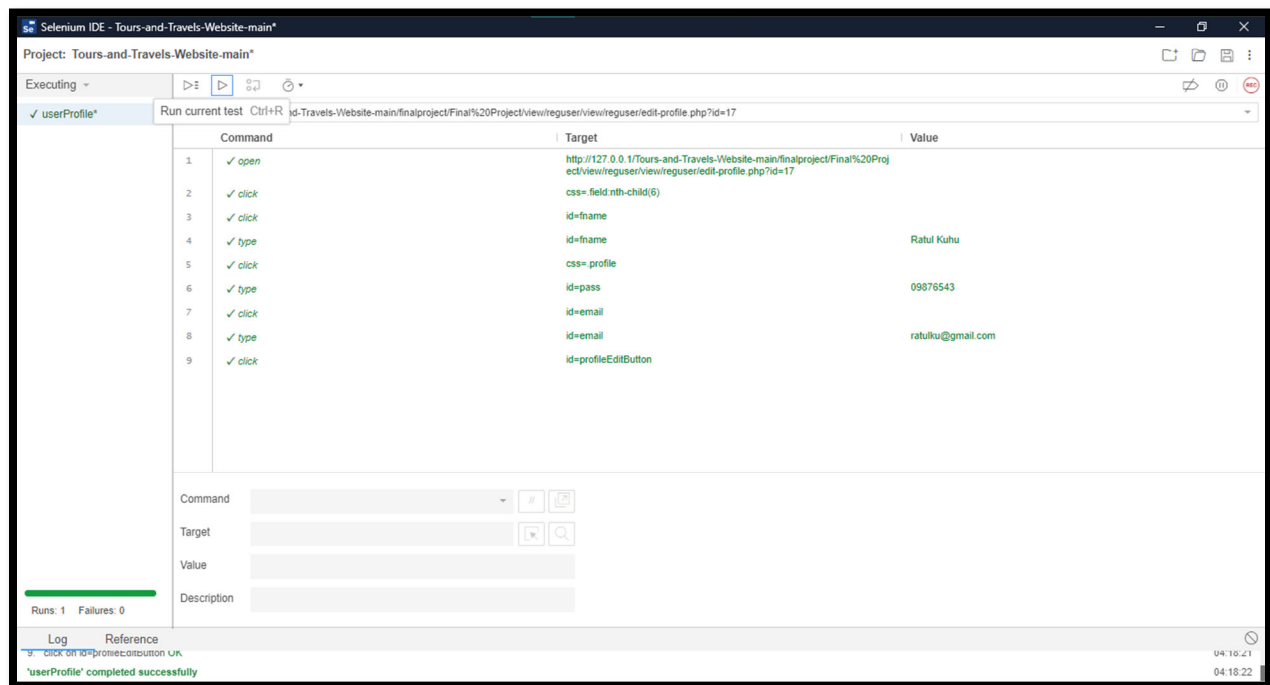

Fig21: Testing the feature for editing a user profile of the system

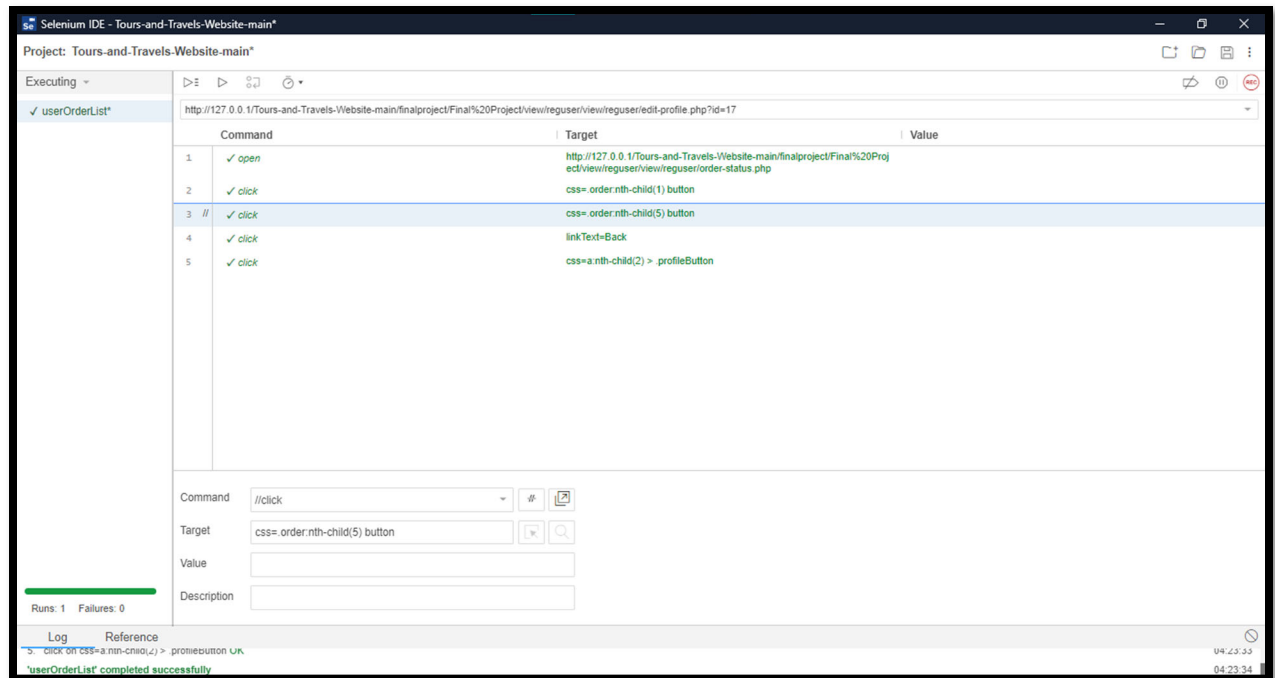

Fig22: Testing the feature “order list” for a user of the system

Merchant User:

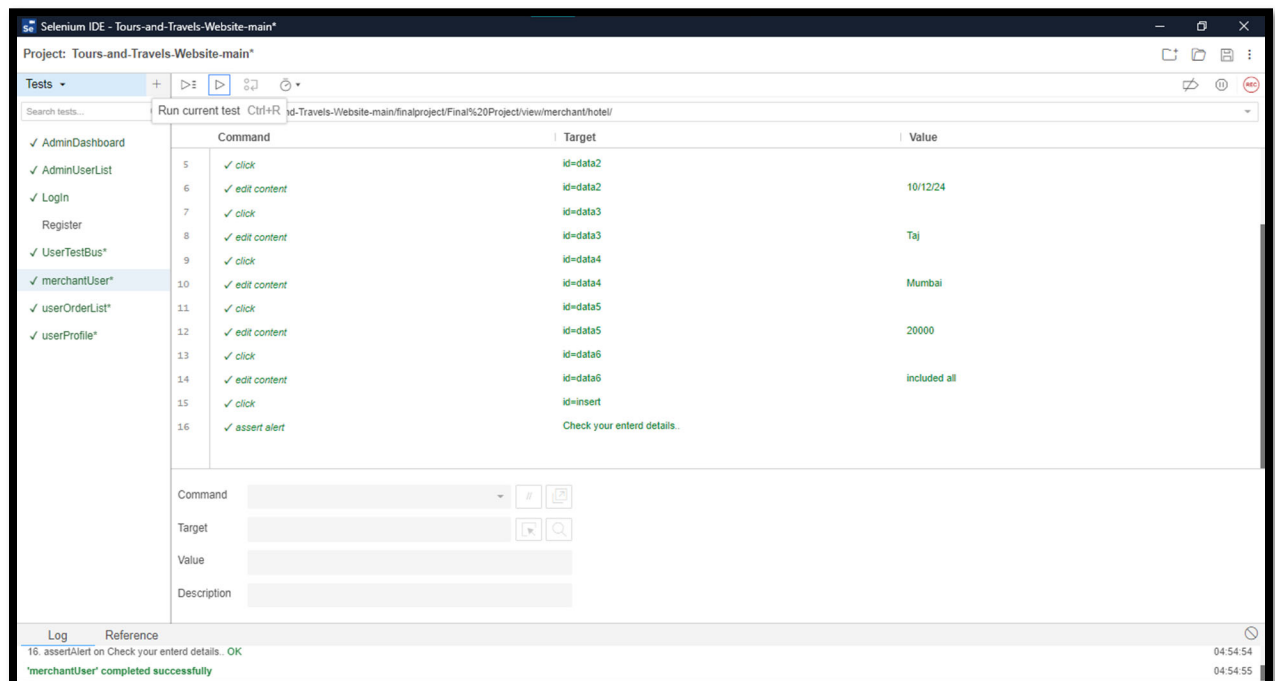

Fig22: Testing the feature “Edit hotel/bus/air/launch details” for the merchant user

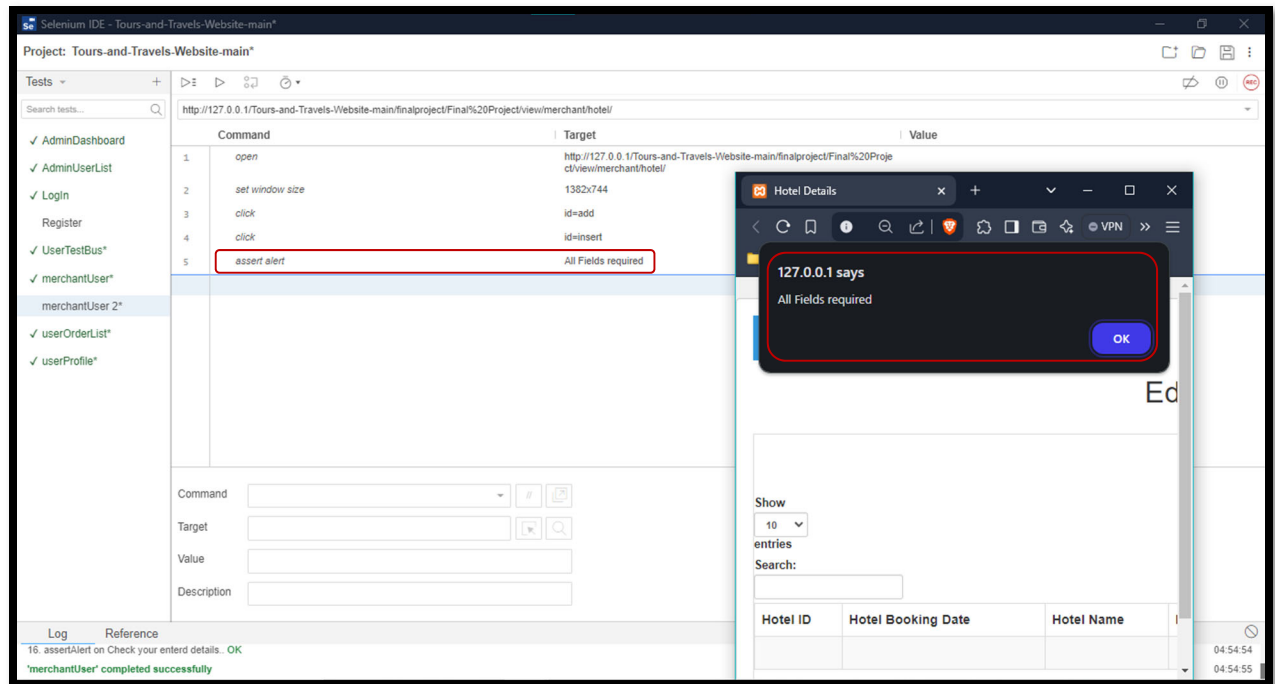

Fig22: Testing the feature “Edit hotel/bus/air/launch details” (with all empty fields) for the merchant user
